Campus Safety Solutions

School officials are concerned about much more than education. Student safety and security has been a top priority. Choosing an effective and reliable campus mass notification and security solution has never been more important, or more vital.

When an emergency occurs, how will you quickly communicate to your students, first responders, staff and visitors?

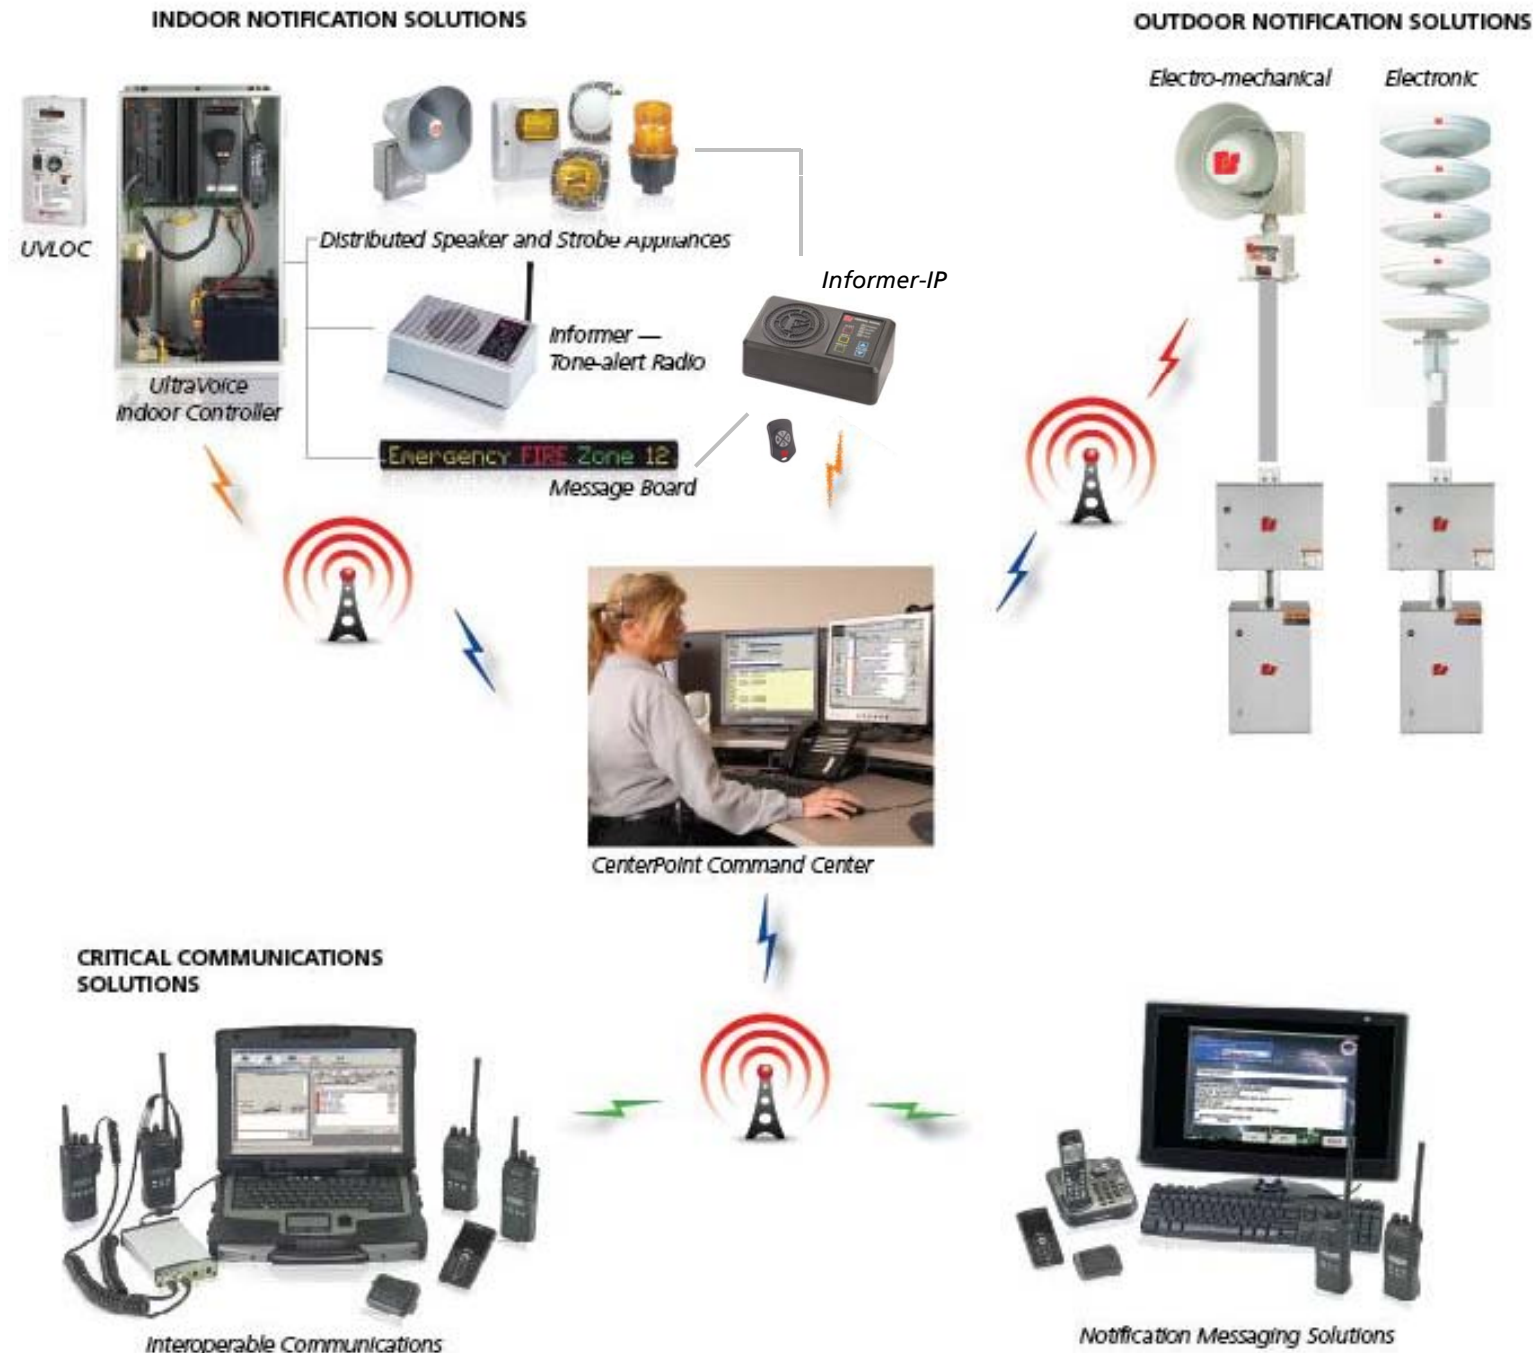

Federal Signal offers a campus safety solution that is custom to fit your safety needs providing fast and reliable communication to immediately notify the campus community of a significant emergency or dangerous situation when it matters most.

Outdoor/Indoor/Personal Mass Notification

Federal Signal provides campus-wide alerting that notifies individuals outdoors, indoors, and individually.

Federal Signal's critical communications system delivers the instant and reliable mass notification that educational campus leaders depend on when seconds count. Our ability to combine indoor and outdoor all-hazard warning via radio and/or Ethernet along with personal phone, text, email, and hand held radio offers campus administrators a robust way to reach their diverse campus communities.

Federal Signal's Campus Safety System is designed for daily use, not just for emergencies.

Outdoor Mass Notification System

- Directional or 360° Omni-directional sirens
- Multiple Tones, live voice, prerecorded voice, text to speech
- Ability to play daily/hourly chimes
- Wood, galvanized steel and concrete pole options

Indoor Mass Notification System

- Ability to synchronize with outdoor system or customize messages per zone or region
- Integration with existing PA system, distributed speakers, or lock-down system
- Controls speakers and strobes
- Intercom, two-way alerting
- Interface to scrolling message displays

Personal Notification

- Send text messages to thousands of students, faculty and parents in seconds
- Alert notifications across multiple devices, including: landline and cellular telephones, SMS devices, email, computers, pagers and 2-way radios
- Receive confirmation of message receipt
- Alert notifications and voice communications can be transmitted in multiple languages

Federal Signal provides an easy-to-use Web portal for students to receive alerts. Students can add their telephone numbers, e-mail and SMS devices . The system will simultaneously alert all of the device types in a user's profile to ensure rapid delivery. By default the system is configured to allow Mass Recipients to Opt-Out of the system, placing their account record in a "Do Not Call" list that can be maintained. Recipients, on the Opt-Out list have the option to choose to Opt-In if they decide at any time.

Automatic License Plate Recognition

A campus could employ a fixed or mobile ALPR (Automated License Plate Recognition) system for real-time notification.

This technology is commonly used to assist in parking management, access control, AMBER alerts, BOLOs (Be on the lookout), wanted felons, sexual predators and DUI enforcement.

Federal Signal is the world leader in ALPR and maintains the highest performance ratings in the industry. Integrating ALPR with the Federal Signals suite of notification products would simplify and expedite emergencies.

Federal Signal's Public Safety Systems Division is a recognized leader and innovator in the industry. We have developed our expansive product line through working closely with our customers and partners using a collaborative product development approach. Designed for interoperability of devices, high-performance and prolonged use, our products offer state-of-the-art features with quality you can rely on today and tomorrow.

With manufacturing operations, engineering, manufacturing and software development underway around the globe we bring together the best products and technologies to support our customers located in more than 100 countries. With our unique global footprint we provide localized solutions to support your needs.

From alerting and notification systems, to networked digital video and analytics systems, to first responder systems, to intelligent transportation systems, to in-car video and data systems, and much more, Public Safety Systems from Federal Signal is helping make the world safer, commerce move quicker, and your community a more secure place every day.
