

Effective and reliable mass notification has become a fundamental aspect of Homeland Security, and ensuring the safety of your institution, campus, facilities, and personnel is vital.

When an emergency occurs, how will you quickly communicate instruction to your students, staff and visitors? UltraVoice™ Campus Alert™ is your solution.

Federal Signal's UltraVoice™ Campus Alert™ System provides fast, complete communication to alert and direct individuals in the event of an emergency. UV Campus Alert™ allows for full campus-wide coverage in a fully integrated in door/outdoor system, featuring unparalleled live and digital recorded voice reproduction for clear announcements; essential when notifying key gathering locations such as dormitories, administration/ classroom areas, and office complexes.

Central Control of both indoor public address and high powered outdoor speaker arrays is provided via RF and ISDN line for complete activation and status monitoring, employing the Federal Commander Digital System. In addition, UltraVoice™ Campus Alert™ provides the capability to easily interface to existing public address systems.

Cross-functionality is a key component to our system's superior technology. Federal Signal has designed UV Campus Alert™ to be compatible with a wide range of outdoor siren arrays. By interfacing the UltraVoice™ controller with existing equipment, your institution is able to cost-effectively realize the benefits of our mass notification system.

Federal Signal's UltraVoice™ Campus Alert™ offers flexible solutions for meeting the unique alerting and notification needs of your institution/campus.
